

# YUVA PRAKASH M

## JAVA DEVELOPER

Chennai, India | yuvaprakashmahalingam2001@gmail.com | +91 8940836244 | [LinkedIn](#)

### PROFESSIONAL SUMMARY

---

**Java Backend Developer with 2+ years of experience** building applications using **Core Java** and **Spring Boot**. Proficient in **REST API development**, **Hibernate/JPA**, and **PostgreSQL**, with hands-on experience in **microservices architecture**. Skilled in optimizing application performance, writing clean, maintainable code, and collaborating effectively within **Agile teams**. Experienced in delivering scalable, high-quality enterprise solutions on time, with foundational knowledge of **Docker** and **Kubernetes** for containerization and orchestration. Available for immediate joining.

### PROFESSIONAL EXPERIENCE

---

**Java Developer** | Texala Technologies | Pune, Maharashtra

**June 2024 – Present**

Enterprise SaaS platform for the US solar industry, built using **Java**, **Spring Boot**, **Hibernate**, **PostgreSQL**, and **microservices architecture**. The platform supports sales management, order processing, role-based user management, notifications, and financial simulation workflows through scalable and secure **RESTful backend services**.

- Enhanced and maintained backend microservices using **Java**, **Spring Boot**, **Hibernate/JPA**, and **PostgreSQL** for enterprise-scale business applications.
- Designed and executed **RESTful APIs** for core business modules and third-party integrations, ensuring reliable system communication.
- Engineered complex **SQL queries** with filtering, searching, and pagination for reporting and resource management modules, directly supporting critical business workflows used by clients in US solar industry.
- Refactored existing codebase to improve performance, maintainability, and code readability following clean coding practices and SonarQube-driven improvements that increased development efficiency.
- Applied structured logging, exception handling, and debugging mechanisms to improve production issue diagnosis and monitoring, contributing to faster incident resolution cycles.
- Performed API testing and performance validation using Postman and JMeter, identifying and eliminating redundant frontend API calls to improve system responsiveness.
- Integrated third-party services including **Twilio SMS API** to enhance platform communication capabilities.
- Participated actively in Agile ceremonies - sprint planning, daily stand-ups, retrospectives, and peer code reviews - contributing to on-time delivery of enterprise SaaS features.

**Java Intern** | Texala Technologies | Pune, Maharashtra

**Nov 2023 – May 2024**

- Worked on backend development using **Core Java**, **Spring Boot**, **Hibernate/JPA**, **PostgreSQL**, **REST APIs**, and **Git** version control.
- Developed an **Employee Management System** using **Spring Boot** and **PostgreSQL** with CRUD operations for employees, departments, and address management.
- Built an **event-driven notification service** using **Spring Boot** and **Spring Application Events** to automatically generate and manage **in-app notifications** based on user actions.
- Designed **RESTful APIs** for user management, notification retrieval, and notification read-status updates with **layered architecture** and **PostgreSQL** persistence.
- Performed API testing using **Postman** and gained hands-on experience in backend debugging, **SQL query handling**, and database operations.

## Projects

- **Event-Driven Notification Service** | GitHub: [Notification-Service](#)
- **Employee Info Tracker** | GitHub: [Emp-Info-Tracker](#)

## ACHIEVEMENTS

---

- Improved backend API response times by ~30% through **PostgreSQL query optimization** and service-level performance tuning.
- Resolved critical production issues and reduced user-reported bugs by ~20%, improving overall application stability and reliability.
- Contributed to the successful delivery of enterprise SaaS features serving the US solar industry, supporting critical business workflows and operations.
- Improved system responsiveness by optimizing API request flows and reducing unnecessary frontend-to-backend communication.
- Strengthened code quality and development efficiency through effective debugging, peer code reviews, **Git workflow management**, and **SonarQube-driven** improvements.

## EDUCATION

---

### Bachelor of Engineering (B.E.) in Computer Science and Engineering

Panimalar Engineering College, Chennai, Tamil Nadu

2019 - 2023

**CGPA: 9.06 / 10**

### 12th GRADE Computer Science

Sowdambikaa Matriculation Higher Secondary School

2018 – 2019

**Percentage: 74%**

## TECHNICAL SKILLS

---

- **Languages:** Java, SQL
- **Core Java:** Collections Framework, Streams API, OOP, Multithreading
- **Frameworks:** Spring Boot, Spring MVC, Hibernate/JPA
- **Technologies:** REST APIs, Microservices
- **Database:** PostgreSQL, MySQL
- **Tools:** Git, Maven, Postman, JMeter, JProfiler, Grafana, Swagger, SonarQube, Eclipse/STS, IntelliJ IDEA
- **Development Practices:** Agile Methodologies, Debugging, Code Review, Code Refactoring, Performance Optimization

## CERTIFICATIONS

---

- Java Beginner to Advanced – Udemy
- Software Development – JSpiders
